**BlackRock – Aladdin Data Internship 2026**

**Location:** Gurgaon / Mumbai / Bangalore, India
**Position:** Intern – Aladdin Data Engineering Track

**About BlackRock**
At BlackRock, we help more and more people experience financial well-being. Our clients are saving for retirement, funding education, buying homes, and building businesses. Their investments support the global economy, finance infrastructure, and drive innovation. None of this would be possible without our greatest investment—our people.
We are committed to fostering an inclusive, collaborative, and forward-thinking environment where everyone can thrive. Learn more at www.blackrock.com.

**About the Aladdin Data Internship**
This internship is designed for students passionate about data, technology, and innovation. As an intern, you will work on real-world projects that impact BlackRock's Aladdin platform—a leading investment management and operations system used by institutions worldwide.
You will be aligned to one of the following engineering tracks:
- **Data Engineer** – Build scalable data pipelines and ensure data quality and governance.
- **Process Engineer** – Optimize and automate operational workflows using cutting-edge tools.
- **Private Market Engineer** – Develop solutions tailored to private market data and analytics.
- **Product Engineer** – Shape product features and user experiences through data-driven insights.

**What You'll Do**
- Gain hands-on experience with Aladdin's data infrastructure and investment workflows.
- Build, test, and deploy automation and engineering solutions using technologies like Java, Python, Spark, Hadoop, Cassandra, Angular, React, and more.
- Collaborate with senior engineers and cross-functional teams to deliver high-impact solutions.
- Participate in firm-wide hackathons and innovation challenges.
- Contribute to the development of scalable platforms using AI/ML and natural language interfaces.
- Take ownership of projects from development to deployment and support.

**What We're Looking For**
We welcome applications from students who demonstrate:
- Strong analytical and problem-solving skills.
- Technical curiosity and a passion for learning.
- Understanding of object-oriented design and coding principles.
- Familiarity with AI/ML frameworks and data engineering tools is a plus.
- Excellent communication and collaboration abilities.
- A focus on product quality and user experience.

**Learning & Development**
- Work within a specialized technology stream while gaining broader exposure through networking and project work.
- Access to BlackRock Academies, mentorship, and career coaching.
- Opportunities to engage with senior leaders and participate in internal forums.

**Equal Opportunity Employer**
BlackRock is proud to be an Equal Opportunity Employer. We evaluate qualified applicants without regard to age, disability, family status, gender identity, race, religion, sex, sexual orientation, or other protected attributes at law.
